SUPPLEMENTAL NOTICE OF ALLOWANCE

This supplemental action is being sent to correct typographical errors in the first notice of allowance, which incorrectly omitted necessary claim limitations in the Examiner's amendment.

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 9 December 2003, particularly line AR, is being considered by the examiner.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Regarding claim 1, seventh paragraph, fifth line, "for outputting said combined output" should be changed to -for outputting a combined output-

Regarding claim 3, first paragraph, line 2 and second paragraph, line 1, respectively, "a digital predistorter" should be changed to -a first digital predistorter- and "from said digital [predistorter]" should be changed to -from said first digital predistorter-

Regarding claim 3, eighth paragraph, lines 1, "a second DA converter for converting said predistorted pilot signal to an analog signal" should be changed to - a second DA converter for converting said predistorted pilot signal to an analog predistorted pilot signal-

Regarding claim 3, tenth paragraph, lines 2 “and said analog predistorted transmission signal” should be changed to – and said analog predistorted signal-

Regarding claim 4, second paragraph, line 1, “from said digital [predistorter]” should be changed to -from said first digital predistorter-

Regarding claim 12, seventh paragraph, line 1; claim 13, seventh paragraph, line 1, and claim 22, line 2 “a pilot signal generator for generating said digital pilot signal” should be changed to - a pilot signal generator for generating a digital pilot signal-

REASONS FOR ALLOWANCE

3. The following is an examiner’s statement of reasons for allowance:

- a. Regarding claim 1, prior art fails to disclose a linear power amplifier or method of linearizing a power amplifier where a predistorter control part with distortion generating paths which generates distortions based on a power series model and FIR filters whose frequency characteristics are controlled by extracted odd order components.
- b. Regarding claims 3, 4 and 14, prior art fails to disclose a linear power amplifier, which uses a pilot signal generator and a second digital predistorter to generate a predistorted pilot signal where the predistorted pilot signal is combined with the predistorted signal to extract distortion components.
- c. Regarding claims 12, 13, 32, 35 and 36, prior art fails to disclose a linear power amplifier and amplification method where a digital signal and digital pilot signal are used to generate a predistortion signal, where the odd order distortion components extracted are the component of the digital pilot signal.

Art Unit: 2817
